LOOK OUT FOR THE KITCHEN BOLLERS. -A curred in Brooklyn last week. An ordinary range boiler burst, and the hot water very badly scalded a lady and soveral ability. badly scalded a lady and several children who were in the kitchen. On examination the boiler was found to be very thin. Phambers have been in the habit of representing that this class of boilers, or, more properly speaking, hot water reservoirs, might collapse from a defective supply of water, but could not explode—a theory under which thousands of families have rested in confiding security. The present instance is fatal to this notion of the constitution of range boilers, and it is to be boped that it will be carefully investigated. Nothing would add more to the discomfort of the average American household than a lurking suspicion concerning the satety of its kitchen, especially if the suspicion should gain access to the minds of the already unreliable cook and laundress.

Landed Property.—A curious illustration or two of the value which may attach to landed property, apart from its worth for agricultural, mineral, or business purposes, appears in our quality; prices low, at late English files. There is an estate called Downham, in the great sporting county of Norfolk, famous for partridge and pheasant shoot-ing. This was sold last year by the Duchess of Cleveland, and after a very smart competition, was knocked down for \$405,000 to a gentleman named Mackenzie, of colossal fortune. The land is so poor that it scarcely, for agricultural purposes, realizes \$5,000 a year but no sooner had Mr. Mackenzie purchased it than a gentleman offered to lease the shooting at \$10,000 a year, and a few months ago the Earl of Dudley offered Mr. Mackenzie \$500,000 for the property. More recently Lord Dunmore has received \$600,000 for a barren Scotch island-a sort of Ultima Thule.
